ABOUT

This app was created to allow users to learn more about different types of succulents as well as being able to purchase a succulent that fit to their needs.

Within this app you can learn about the origins of each plant, color of blossom, growth habit, and care instructions. In addition to this information you can also view pictures of each plant as well as rate them on aesthetic appeal.

While viewing all of these different options you can add plants to your list, so you may keep track of your favorites, and add them to your cart to purchase the plant.
